

PROBLEMATIK

Nicht der Mensch hat den Planeten befallen,
sondern seine Industrie.

ZIELSETZUNG

Das parasitäre Konstrukt unserer Industrie
in einen probiotischen Organismus wandeln.

VISION

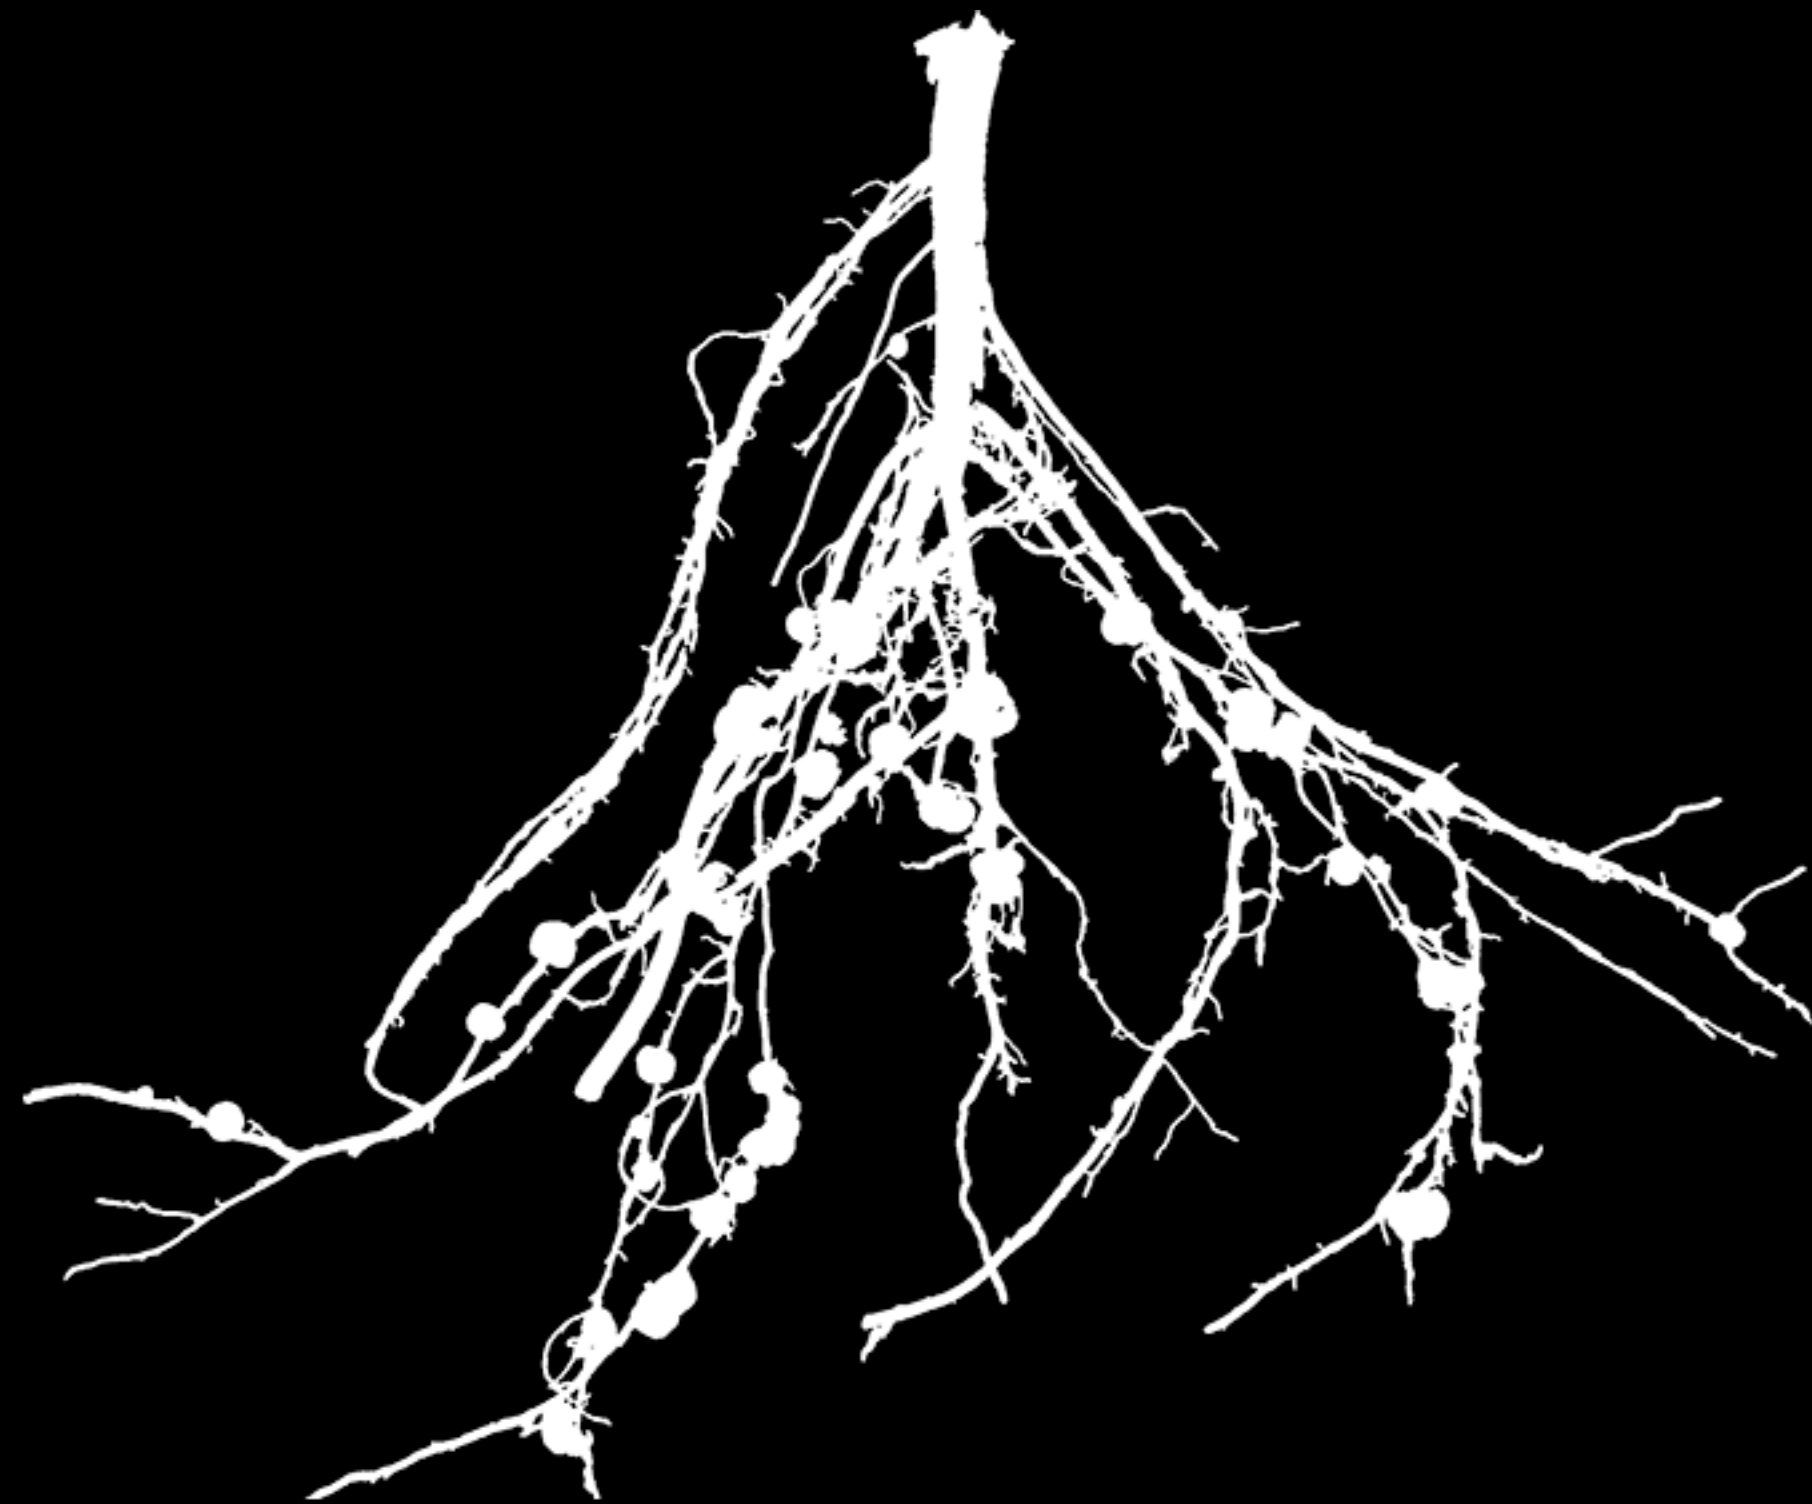

Im Jahre 2100 hat der Mensch seine industriellen Errungenschaften in einen mechanischen Organismus unter der Erde verlagert.

THEMENFELD

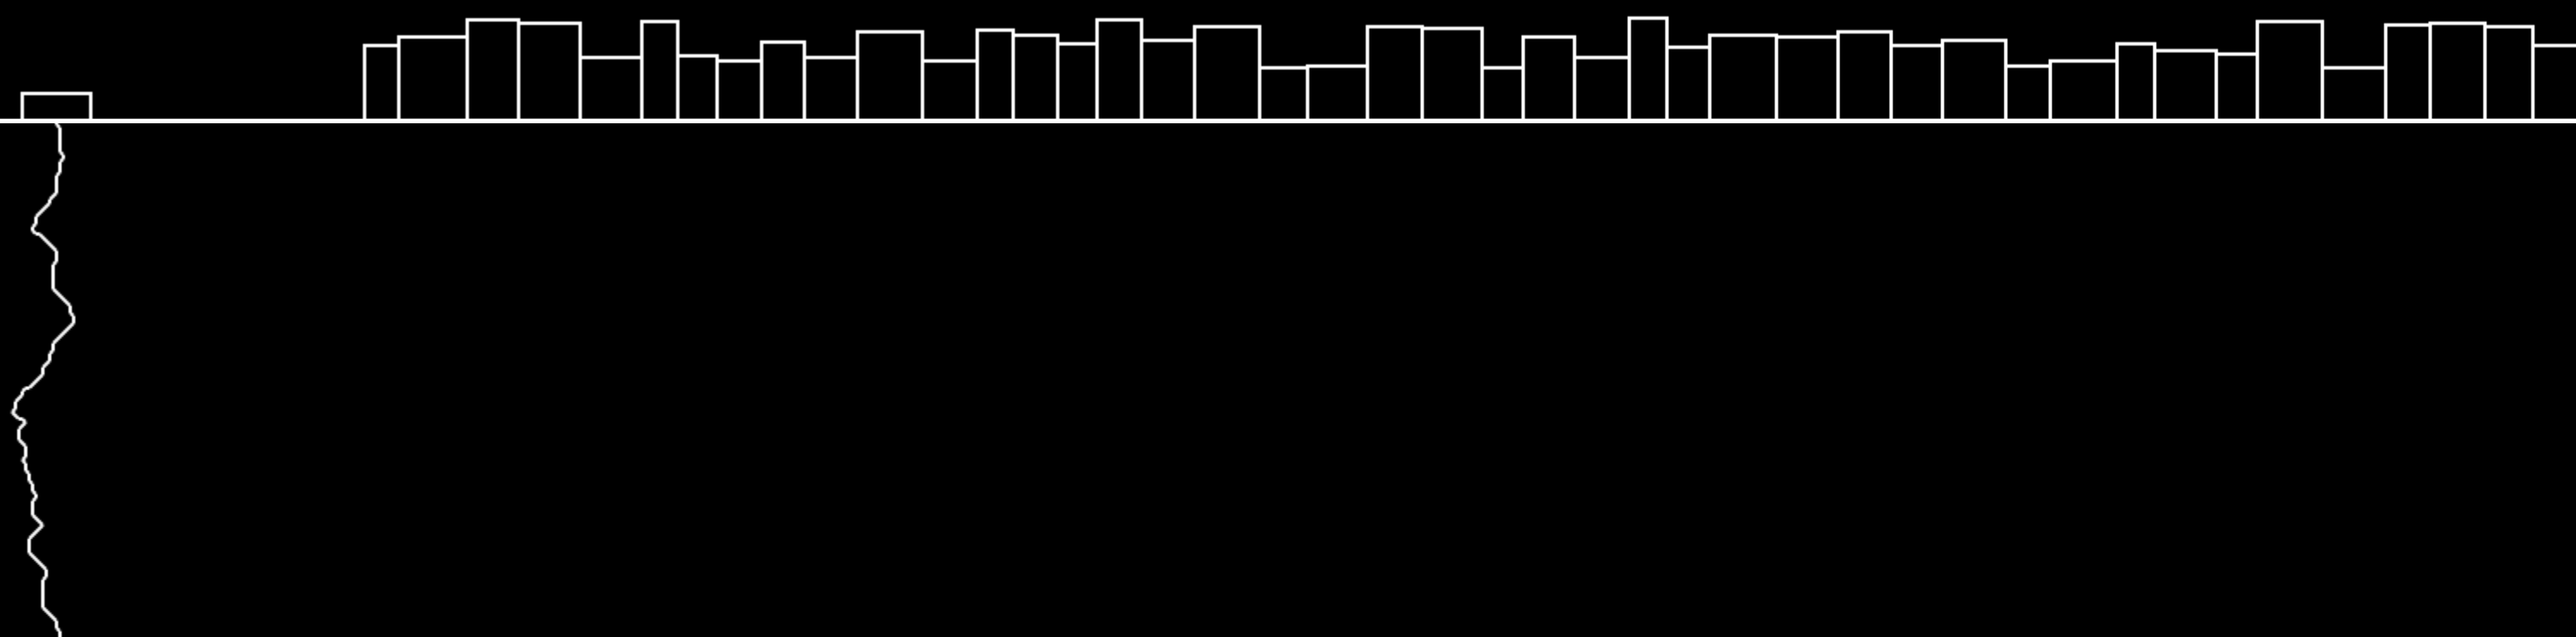

Künstliche Intelligenz

Handwritten Chinese calligraphy in a dense, vertical column. The characters are small and tightly packed, written in a traditional style. The overall appearance is that of a single, continuous line of text, possibly a chapter or a section of a classical text. The ink is dark and consistent, and the background is plain white.

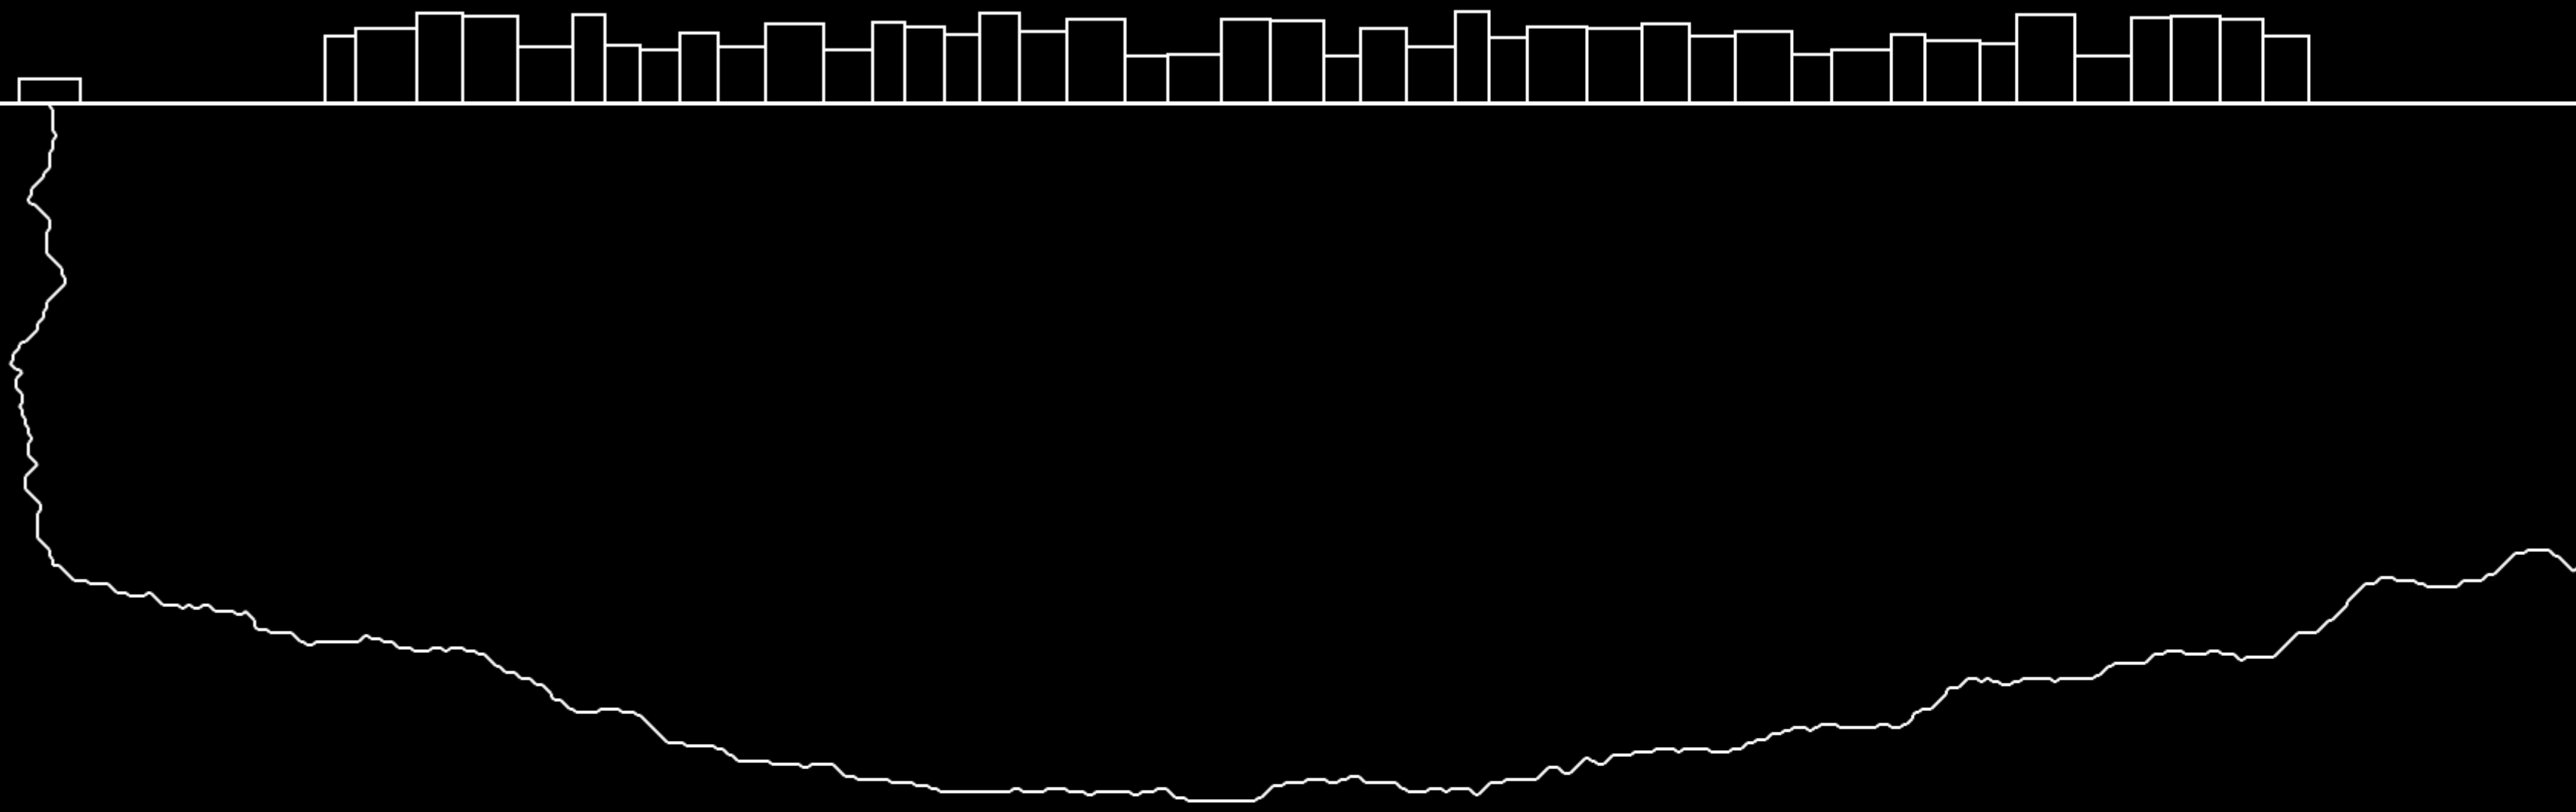

COWPEA - *Vigna unguiculata*

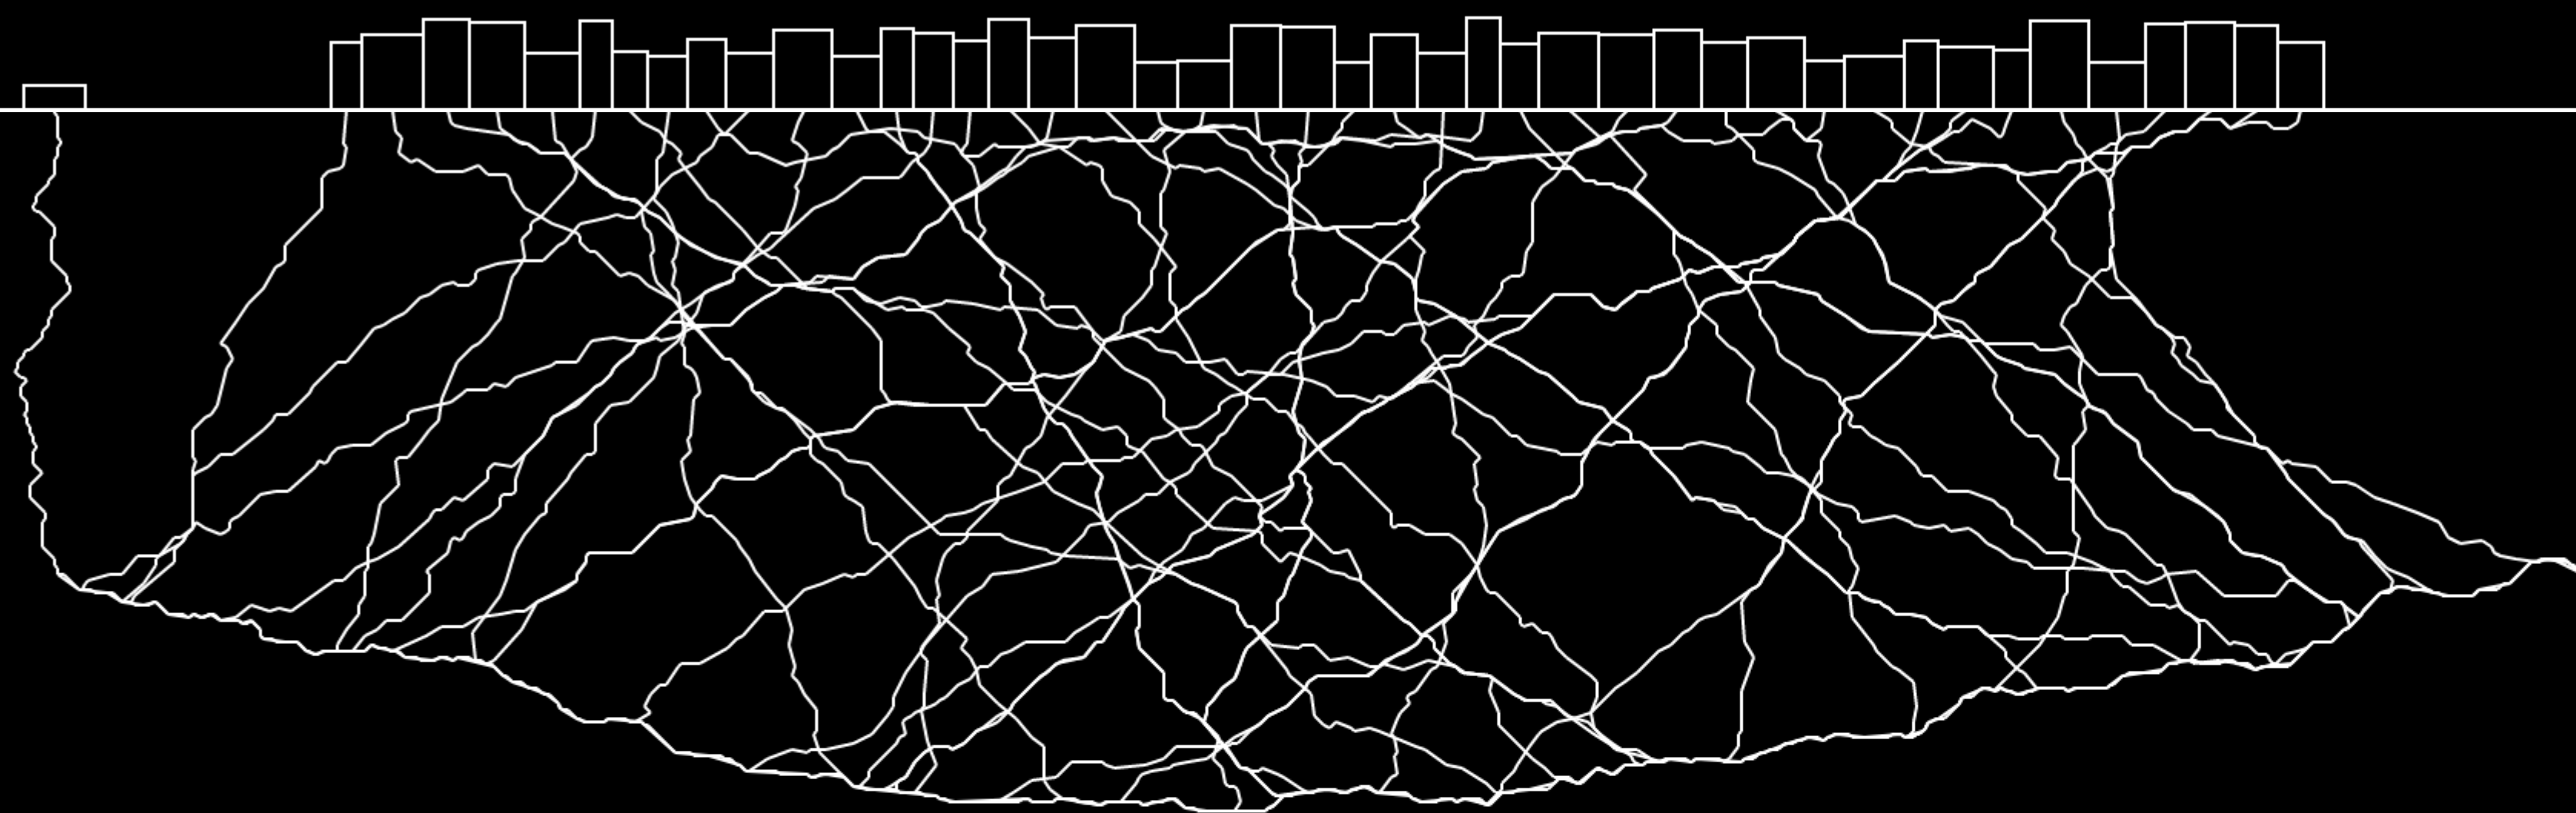

2050 - Initiale Ausbreitung

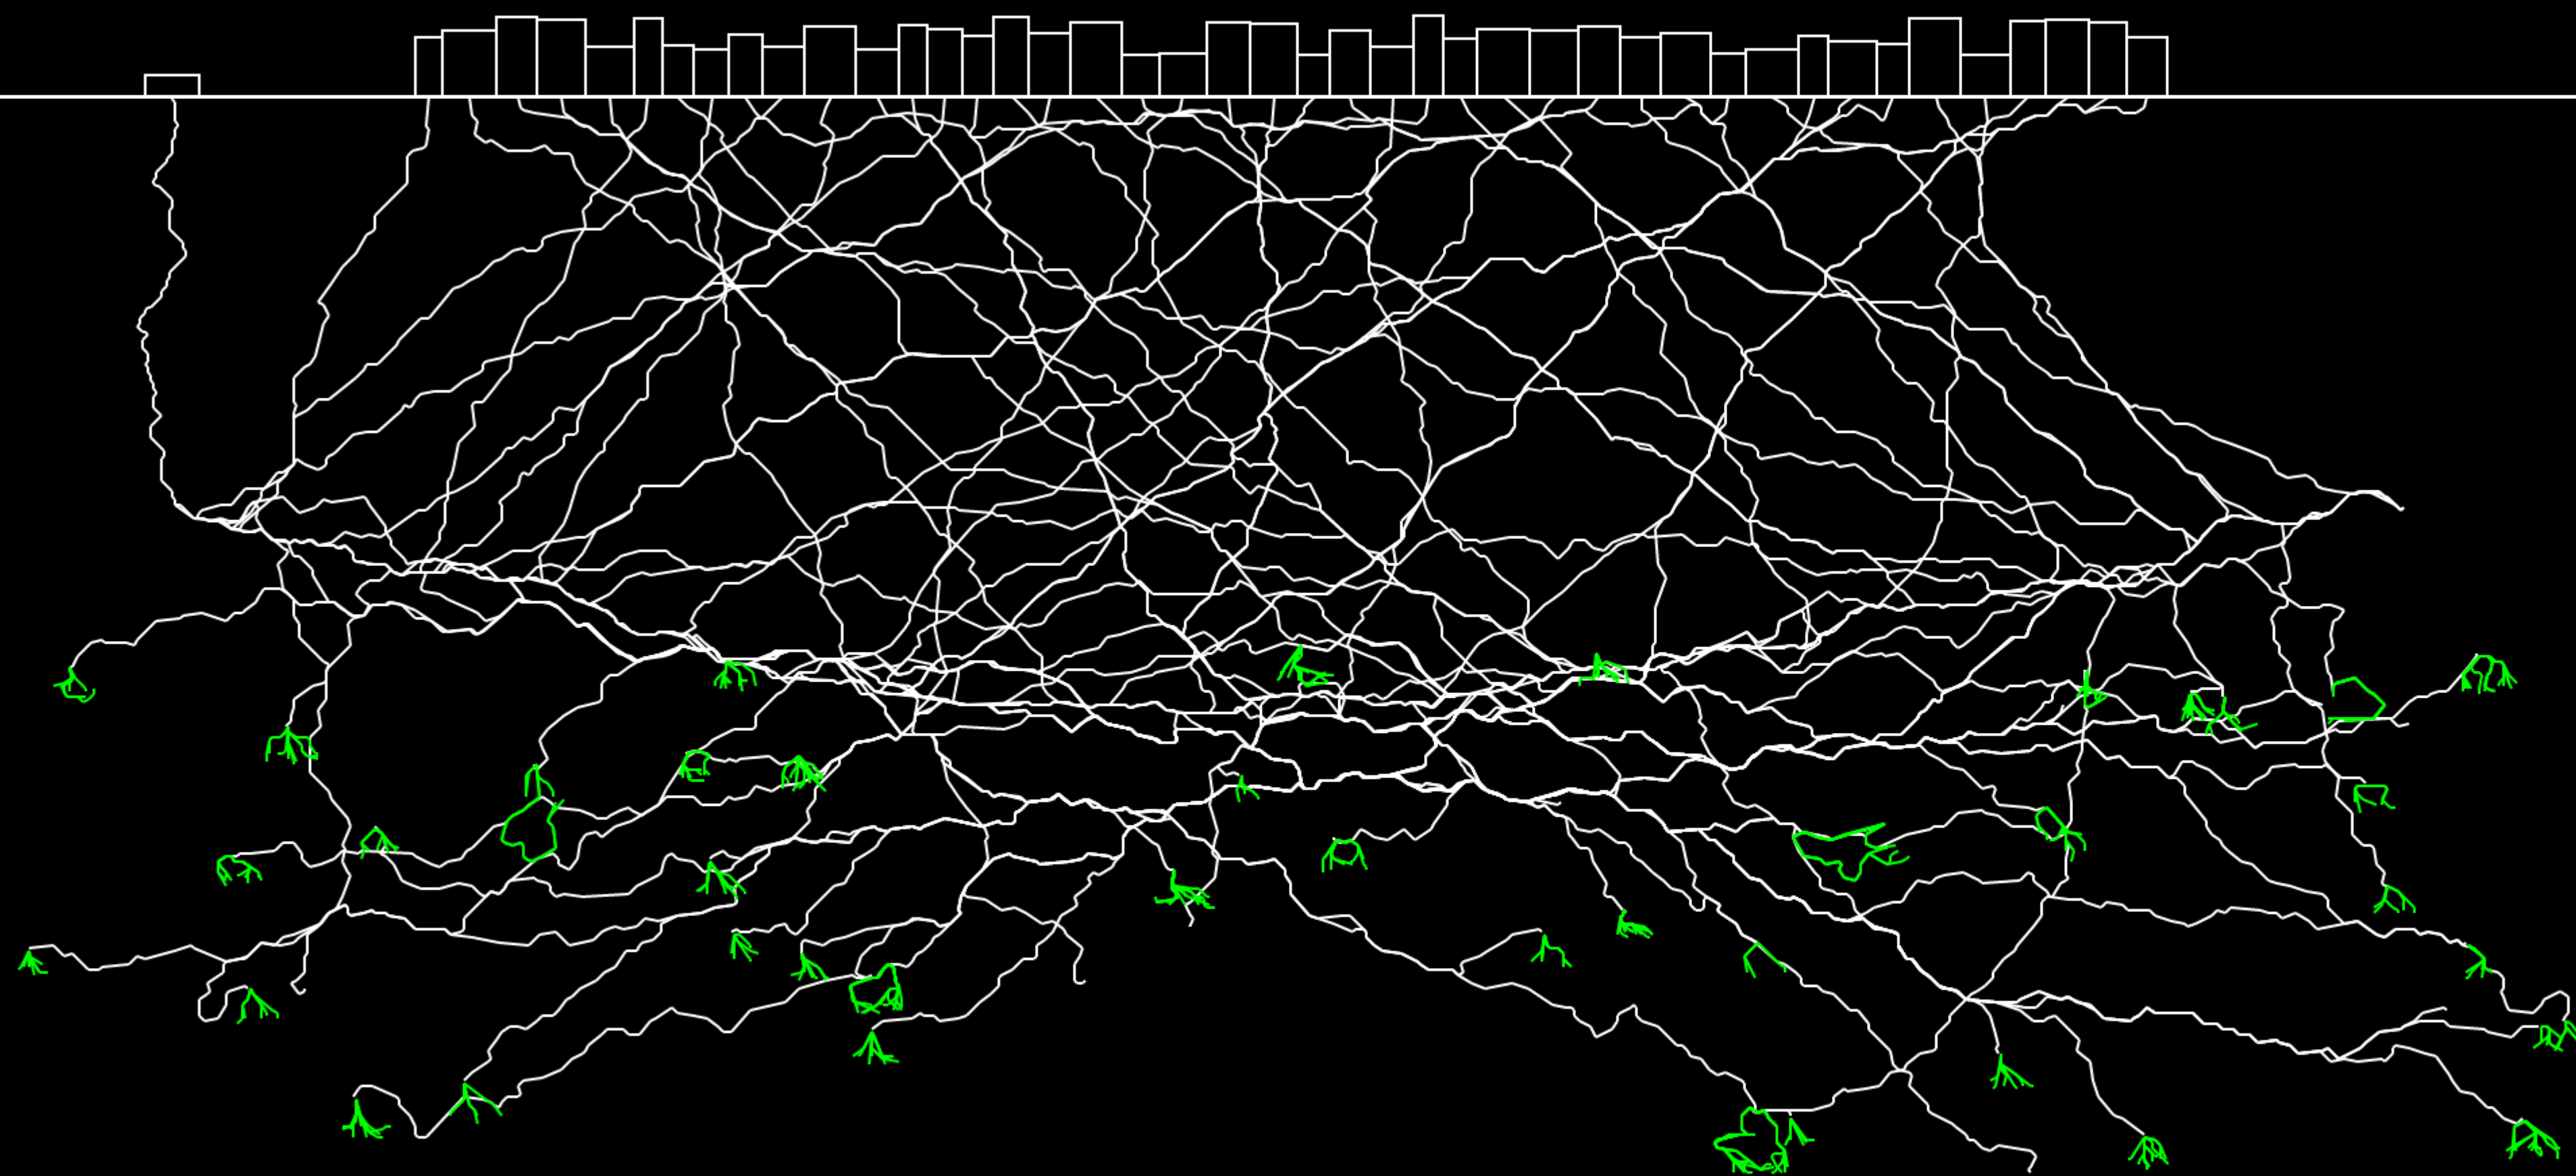

2056 - Legen der Haupttransportader

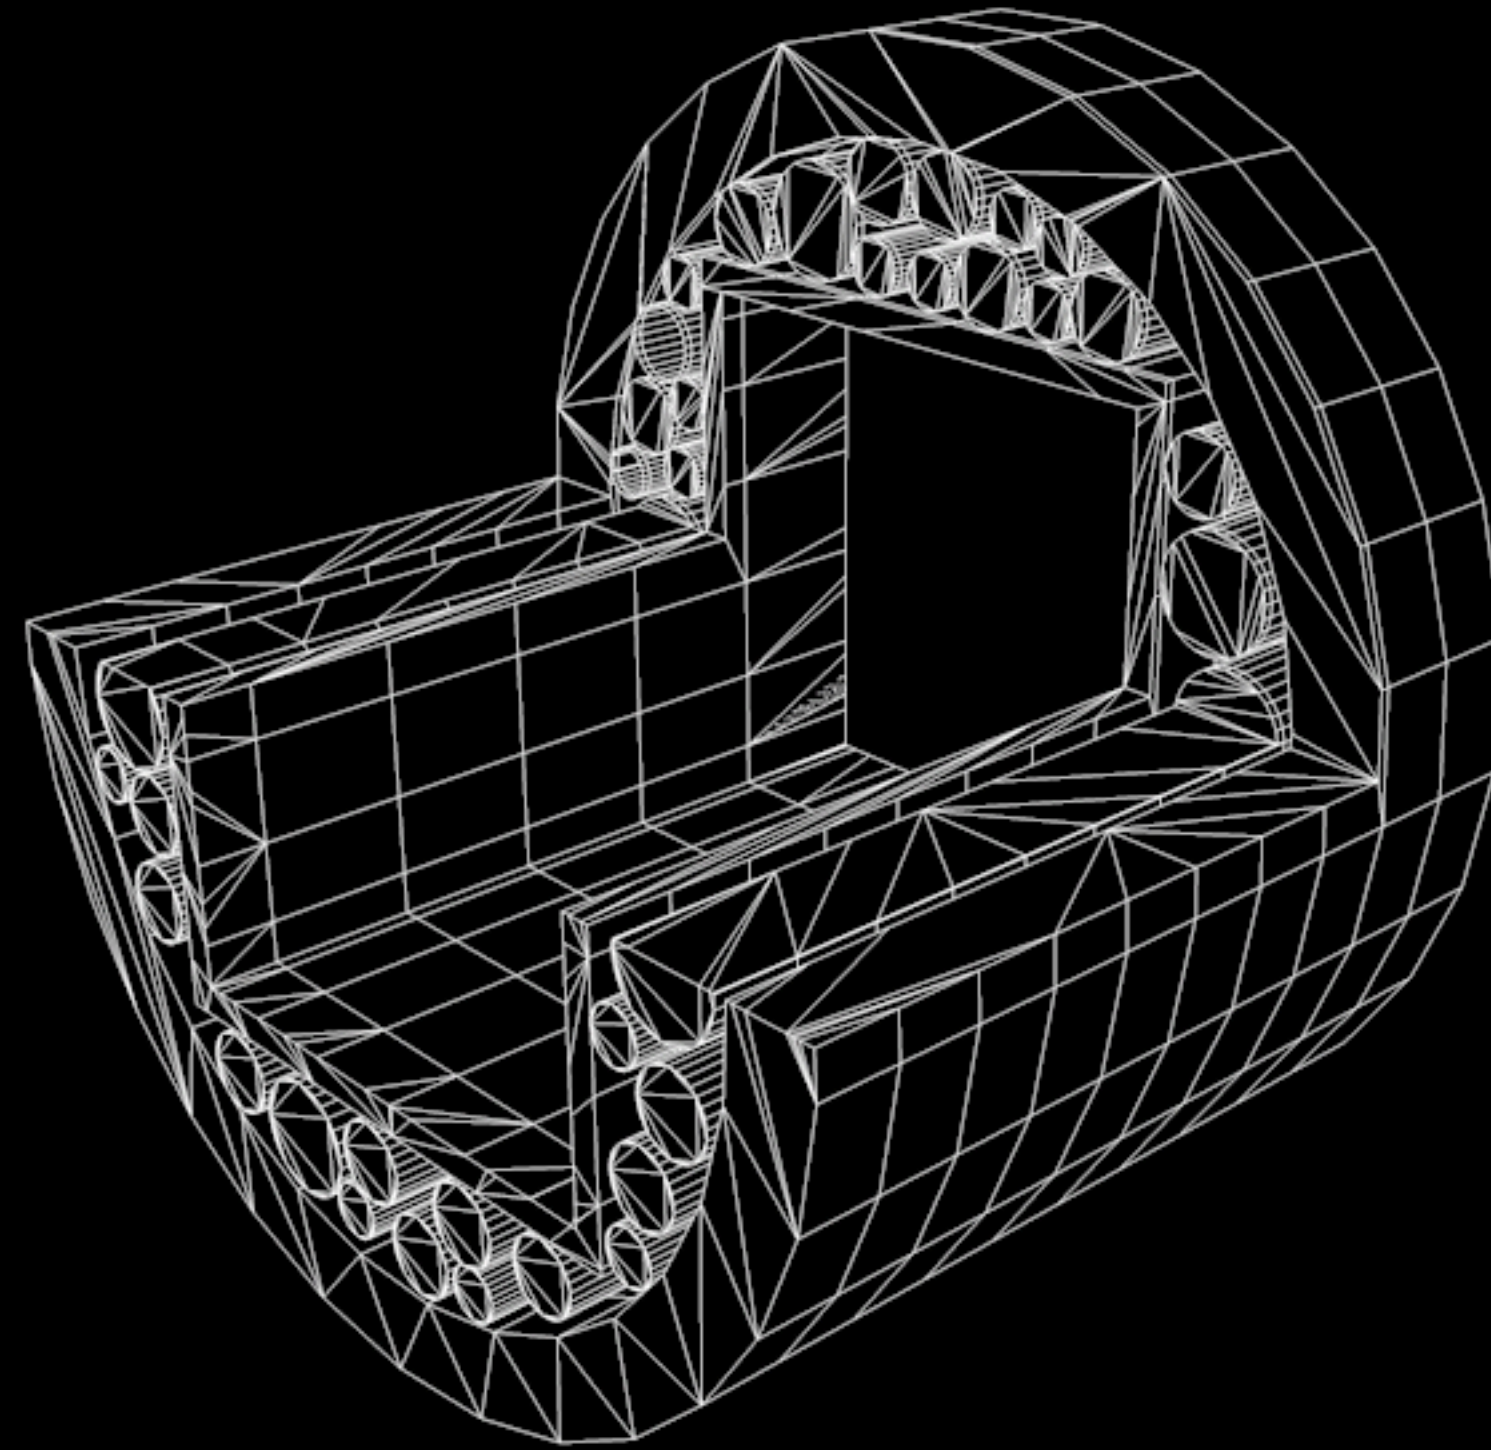

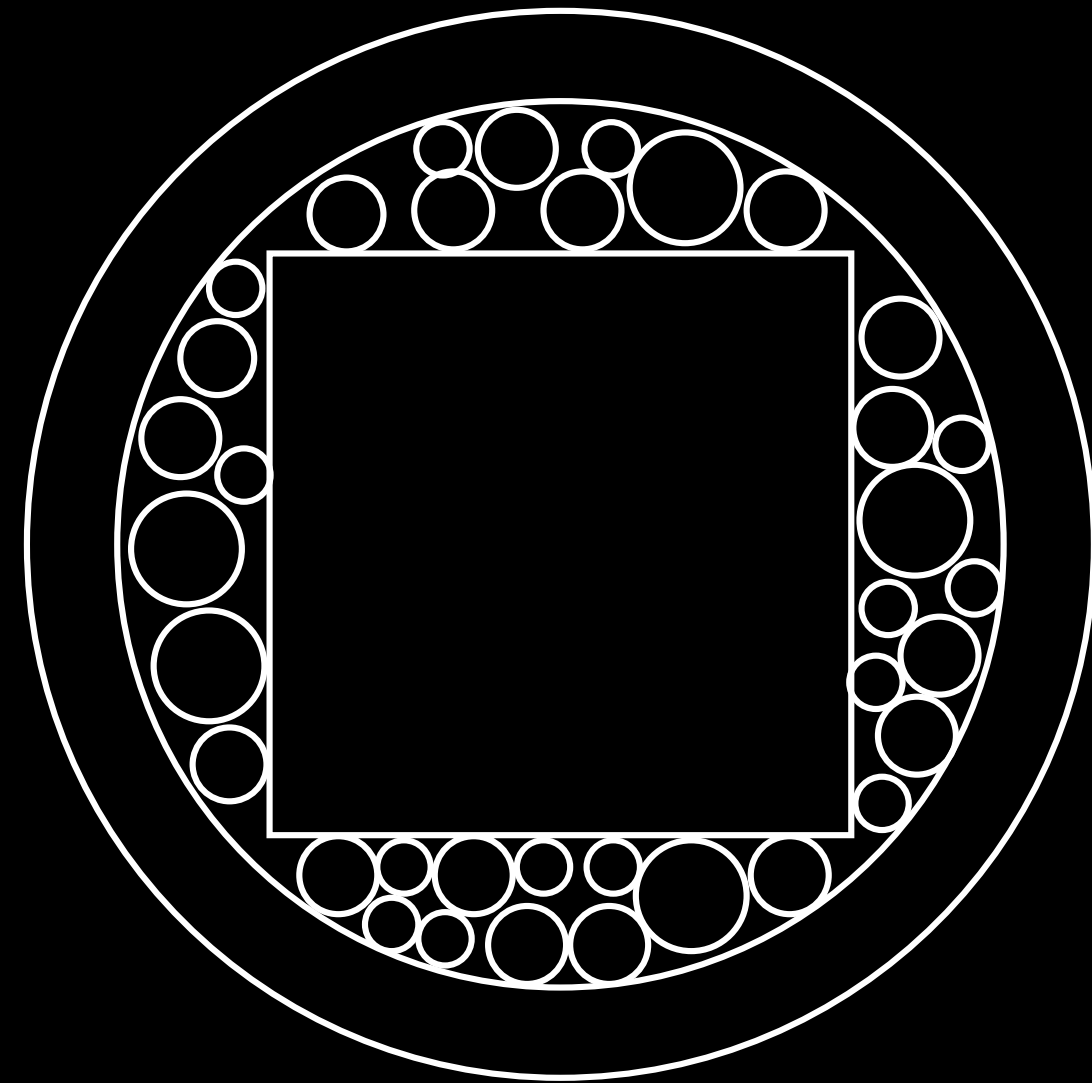

2060 – Verbinden der Stadt

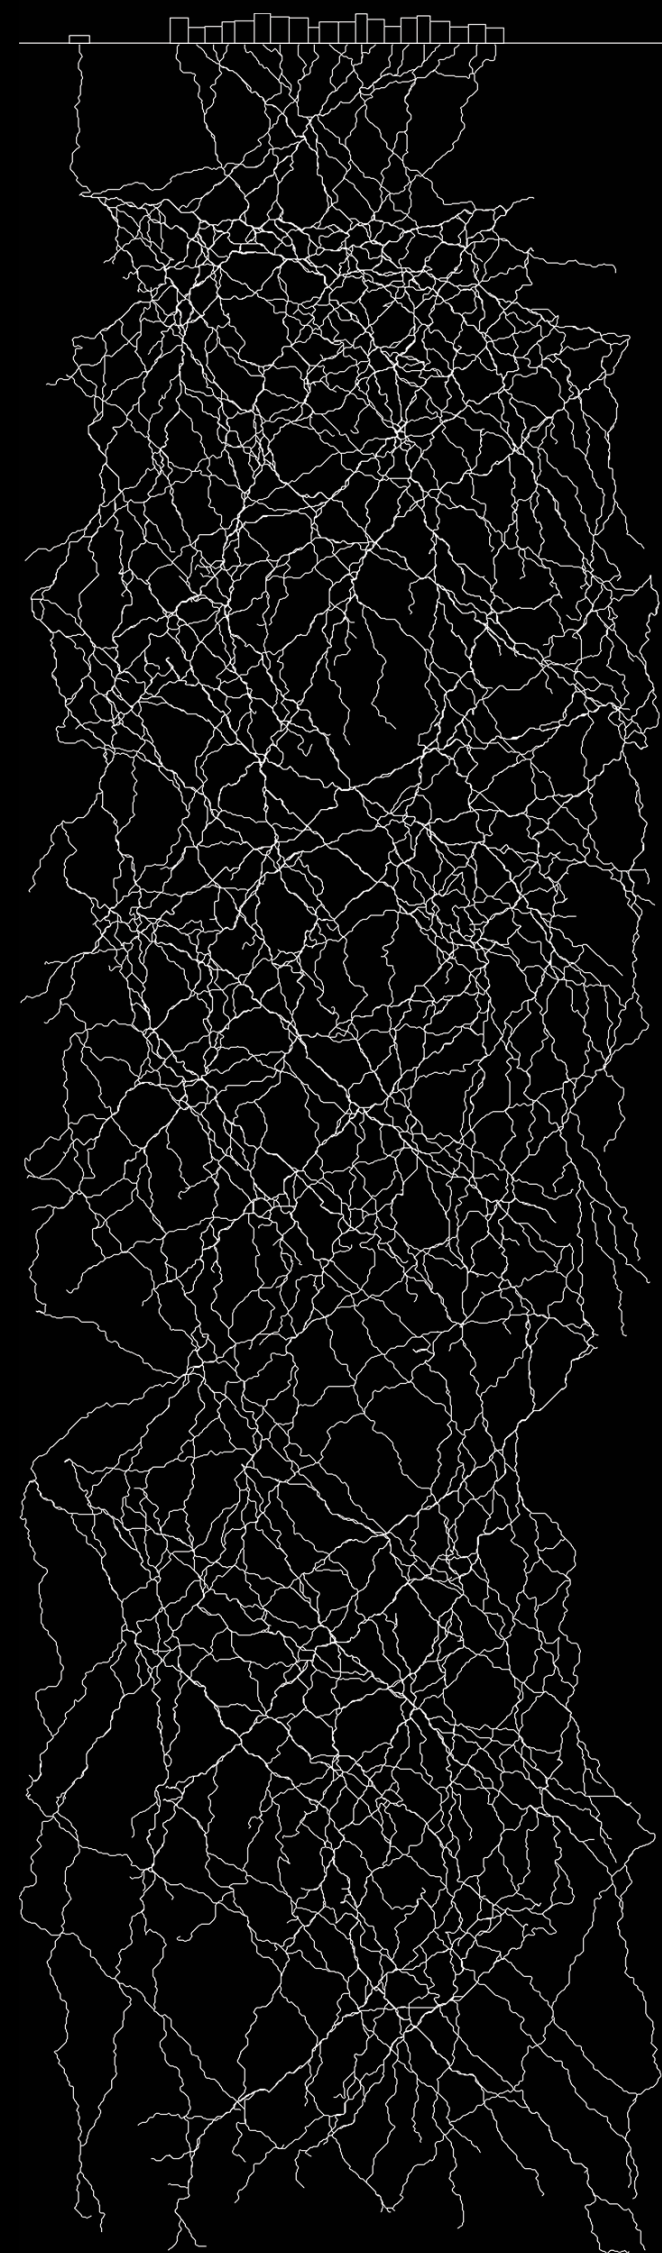

2065 - Erzeugung erster Industrieräume
